Installation Guide

Description

The Premier's Reading Challenge (PRC) Listmaker program compares the contents of a library system's database against the items listed in the Premier's Reading Challenge booklists.

Listmaker displays all items matched or all unmatched. The list can then be printed or exported. Exported lists can be transferred into Word, Excel or another program.

If you are using the Bookmark library system, Listmaker is built into it. Because of this, the stand-alone Listmaker program no longer used for Bookmark. Use the built-in PRC system instead. Refer to the Cataloguing manual and Fact Sheet for information or call the help desk.

If you are using another system, such as Oliver or Amlib, Listmaker can scan a MARC format file of exported catalogue records. Refer to your library system's documentation or help desk for assistance exporting catalogue records.

Listmaker can also 'tag' items in your library's system database so they can be easily spotted in OPAC searches.

Every time the Premier's Reading Challenge book list is updated, it will be made available on the PRC website. The new list can be downloaded into Listmaker.

Listmaker works on both 32 and 64-bit versions of Windows, including XP, Windows 7, 8, 10 and Windows Server.
