

FACT SHEET

Differences between version 9 and version 10

April 2014

Changes from v9

Documentation for version 10 is on the main menu. There is no printed manual.

If it doesn't appear give it time. Sometime it says not responding . Sometimes it is fibbing , other times NOT. If in doubt about anything, close the program then go back in to check.

Access codes are no longer used, unless you set up the passwords that way. Each module has it's own password. (Read the manual)

Circulation.

This is similar to WinCirc.

Due dates. The format of dates is very different 4 digit for the year 2014, and number for the rest eg. 21/03/2014

You can delete an item that is on loan. You don't have to return it first.

File and edit is the top left corner of the circulation menu, and are for the librarian only. Make sure they have passwords.

Search

This is similar to PAW

Cataloguing.

There is no allocated space. See the manual for more details.

RDA fields are included. (If in doubt leave it out)

Reindexing and rebuilding are not essential as in version 9, but they can still be done.

Illustrators are entered differently. In author field.(read the manual)

Barcode specs and ordering barcodes. If non standard ring Help Desk

Illustrators are entered differently. In author field.

Press enter to create a new line for a new series. No more space semicolon space.

Reset copy1 values is no longer necessary.

There is no contents editor. If you copy a book the contents are automatically copied.

Importing from SCIS

Import the covers first so that it is possible to see which covers were downloaded.

There is a way to generate the files to upload to SCIs so that you catch catch up on covers. (Read the manual)

Reports

email

Dean.Hodgson@sa.gov.au

Marion.Mitchell@sa.gov.au

website

<http://www.bookmark.sa.edu.au/>

Statistics don't have to be cleared.
